

- The American Lock, made to Big Red LOCK specifications, is recessed in a solid steel casing. The key hole is also recessed and spins if someone tries to drill it.
- Limited lifetime warranty on the American Series 2500 lock.

# Big Red LOCK

## Protect any trailer with a 2 or 2<sup>5</sup>/<sub>16</sub> inch Bulldog hitch

Pin sits in a recessed hole and is secured by a 7/16 inch stainless steel locking pin making it impossible to pull out with pliers or crow bar.

- The Big Red LOCK is the only high security lock on the market that addresses all three of these security issues:
- Protecting the **lock** from prying and drilling.
  - Protecting the recessed, hardened **pin** from prying or cutting.
  - Protecting the **lock body** from sawing or cutting because it is the strongest, toughest made for a trailer hitch.

Big Red LOCK keeps this trailer safe in the storage lot.

### Big Red LOCK features and benefits

- Heavy steel construction cannot be cut by hand.
- Locking pin sits covered and recessed, making it impossible to break.
- Peace of mind knowing you have a super theft deterrent on your trailer.
- Possible lower insurance premiums. (Check with your agent or carrier.)
- Locks can be keyed alike for a small fee.

Big Red LOCK is on a trailer tongue securing the chains and hitch.

## **Our story**

After the third trailer disappeared from our fenced and padlocked yard, we were angry enough to do something about it. We made a lock so indestructible that a would-be thief takes one look and moves on. When he sees a Big Red LOCK on your trailer, he will move on, too.

**Ken Marley & Stan Solloway, Inventors**

## **Crime stories tell why you need Big Red LOCK**

- Clinton Township, GA. Police are continuing their investigation into a string of thefts of trailers, construction and cleaning equipment. The most recent theft was of \$10,000 worth of cleaning materials and a cargo trailer. This comes nearly a month after about \$40,000 in construction equipment was stolen from two work sites near Millar and Garfield. Stolen items included tools and saws.
- Investigators have found a pattern of selected tools and the method of break-in, suggesting a ring or multiple rings of activity. The burglars are going after four general targets:
  - Construction vehicles and trailers set up at commercial sites.
  - Contractor trailers parked at motels and businesses.
  - Residential construction trailers at job sites.
  - Landscape trailers parked on job sites.

**The KEY to trailer protection depends on a good LOCK**

**Don't be an easy target!**
